Adding a website shortcut on your home screen looks like an app.

**iPhone/iPad**

Open Safari on your iPhone and type www.londonderry.org into the address bar.  When you are looking at the page, tap the share button at the bottom of the screen

This will open a new menu option that includes Add to Home Screen.  Tap on this icon to continue adding the website to your iPhone home screen. On the next screen you will name the shortcut.

Once this is done the website shortcut will be on your home screen next to all your apps.

**Android**

Launch Chrome for Android and open the website you want to add to home screen.  Tap the menu button and to Add to home screen.  You'll be able to enter a name for the shortcut. The item will appear on your home screen like any other app.

**Windows**

The process is similar on Windows Phone. First, open the website you want to pin in Internet Explorer. Tap the More (…) button and tap Pin to Start in the menu that appears
