

STRATEGIC PLANNING

Proper planning is essential to the efficient and effective operation (short and long-term) of the School District. Thus, the School Board will charge the Superintendent with the task of developing and presenting to the School Board each year – no later than the end of October – a five-year Strategic Plan for their consideration and adoption.

The Superintendent will also be charged with presenting to the Board – no later than June of each school year – a progress report on said plan.
